December 14 , 1964

Dear Sir ,

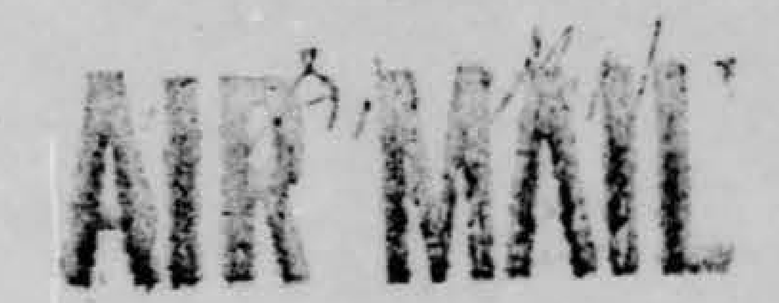

About three months ago I was sitting outside when all of a sudden one of the stars I was watching began to move across the sky . There were no sounds of engines , and it was not aircraft due to the fact that it had been in the same position for more than an hour . A few days later Isaw a similar movement in the same area , with one exeption , it would stop , then start again . The second time there were also no engine noises , Each time this happened a friend of mine was with me , I did not report this until now because I did not now we were supposed to .

Thankyou.
